The solution to boost your face-to-face and distance learning courses

MOBITEACH is the online solution for the creation, management and facilitation of training sessions in face-to-face and remote! With MOBITEACH, rethink the engineering of your learning resources to boost your training and engage your participants!

MOBITEACH'S STRENGTHS

FACE-TO-FACE / DISTANCE

Facilitate your face-to-face training with the MOBITEACH Box or your distance training with a virtual classroom, or combine the two modalities!

LIVE MONITORING

Monitor the activity of your participants in real time. Visualise their individual and collective progress. And get detailed reports of the different sessions!

MUTUALISATION

Enrich the MOBITEACH library with your learning paths, resources and activities, then share them with other trainers!

SESSION MANAGEMENT

Schedule your training sessions directly with MOBITEACH. Invite your participants. Acknowledge their participation with the integrated sign-in sheet!

ENGAGING ACTIVITIES

Vary your pleasures!
Involve your learners with many original and innovative activities.

MOBITEACH Box

Even without an internet connection, it is now possible to organise a training session with the MOBITEACH Box: it generates its own high speed and long range Wifi network and can connect up to 50 participants.

SCORM, LTI and xAPI compliance

MOBITEACH complies with the majority of learning technology integration standards. Learner progress can be reported on an LRS server via xAPI, and the results of the quizzes synchronized with Quiz Manager or Moodle.

BENEFITS FOR ALL

MOBITEACH catalyses training at all levels of your organization.

ORGANISATION

MOBITEACH centralises your organisation's learning resources, results and data. It ensures the traceability and follow-up of training sessions, providing administrative follow-up and tracking for easier management of employees within the organisation.

CONTENT CREATOR

The author easily creates his pedagogical structures with MOBITEACH, adding or creating resources that he can share with facilitators. He benefits from various types of activities to boost his contents in a simple creation environment.

TRAINER-FACILITATOR

With MOBITEACH, the facilitator can easily manage the logistics of his or her face-to-face or distance training courses. He creates and manages his training sessions in a single environment, centralising his resources, activities and participants' results. He dynamically presents his content, involves the participants and follows their progress in real time to give them feedback.

PARTICIPANT

Participants are involved in their training and are stimulated by the alternation of activities. Attention, memorisation, participation and motivation are thus reinforced for an enriched and engaging training experience.

OUR TEAM SUPPORTS YOU

MOBITEACH is also a team dedicated to your support!
We help you to rethink and boost your training courses by accompanying you in the pedagogical reengineering of your content and in the use of the solution, to make you autonomous step by step.
We co-construct with you differentiating and engaging training sessions for your participants by boosting your pedagogical resources with MOBITEACH activities. Caring, listening and expertise are the assets of our team to make your training projects a reality!
